The masks, which you donated to Disentis Monastery and its school

Dear Liu family,

We are full of joy to have received from you this wonderful gift! The 3000 medical/surgical masks, the 100 surgical masks and the 320 KN95 masks arrived in excellent condition in Disentis ten days ago. We are very thankful for your donation, since masks are still scarce in Switzerland, although our government makes good efforts to provide them for the general public now as well. We shall give a major part of the masks to our nearby nursing home "Puntreis" (Guannan has visited it) and to the nurses providing outpatient care for the sick and elderly people living at home in our region, a social service called "Spitex". Moreover, of course, we shall keep some masks for our school and our community as well. We are very thankful for your donation, which has become a true and great Easter present for us! Enclosed you will find some photos, where we display the masks, which we received.

Happy Easter and the richest blessings of our Lord Jesus Christ, who came back to life from the dead! With best and wholehearted regards from Disentis Monastery!
